

Power Essentials:

Fundamental concepts of power delivery and system optimization

I. Introduction

- A. Short company history
- B. Caelin history
- C. My history
- D. Shunyata today

II. Power Fundamentals

- A. The Source of Sound
- B. The Power Grid
 - 1. Completing the circuit
 - 2. Everything is an extension of the power grid
- C. Power Supplies
 - 1. non-linear current draw
 - 2. A near-field, high frequency occurrence
- D. DTCD and CCI as a result of this evidence

III. Technologies

- A. DTCD
 - 1. Explanation
 - 2. Current Analyzer test
- B. CCI
 - 1. Explanation
 - 2. Entech demonstration
- C. NIC
- D. Copper, OFE101, Ohno
- E. Sonic welding
- F. QR/BB

IV. Performance demonstration

- A. Power cable
- B. Power distributor
- C. Digital

V. Questions

VI. Music demonstration
